----------------------------------------------	---

1. Introduction

Department of Veterans Affairs (VA) has a need to improve the efficiencies of the outpatient medical scheduling processes through improved visibility of information. VA has created a comprehensive scheduling solution to modernize the Veterans Health Information Systems and Technology Architecture (VistA) Scheduling (VS) product.

1.1. Purpose

The purpose of this document is to provide a summary of the enhancements and defect corrections that make up VS Graphical User Interface (GUI) Release 1.7.46.0. The release software package is comprised of the following:

- VS GUI application 1.7.46.0
- VistA M patch SD*5.3*853

1.2. Audience

This document targets the administrators and users of the VistA Scheduling package.

2. This Release

Please see Features and Functionality for a summary of the enhancements and defect corrections implemented with VS GUI Release 1.7.46.0 and VistA patch SD*5.3*853.

3. Features and Functionality

The following subsections describe the features included in the VS GUI 1.7.46.0 package and VistA patch SD*5.3*853.

3.1. Enhancements Implemented and Defects Fixes

Table 1 lists the enhancements implemented and defects corrected in VS GUI Release 1.7.46.0 and VistA patch SD*5.3*853. The work item ID is the Jira issue number.

Table 1: Enhancements and Defects Fixes

Work Item ID	Summary of Change
VSE-5701	VSE Error when scheduling walk in appts between 12a-1am
VSE-5873	VistA: Modify SDESCHECKOUT routine to lock/unlock record in SDE file
VSE-6028	VS GUI: Modify the end time of midnight appointments
VSE-5522	VistA: Create a new version of the SDES CREATE CLINIC RPC that adheres to SDES standards
VSE-5523	VistA: Create a new version of SDES EDIT CLINIC RPC that adheres to SDES standards
VSE-5564	VistA: Rewrite SDES CREATE APPT BLK AND MOVE to accept a clinic IEN
VSE-5566	VistA: Create a new SDES2 RPC to get the medication list
VSE-5576	VistA: Create RPC to return all open appt requests, consults, and recall reminders for a given institution
VSE-5742	VistA: Create a new SDES2 GET HOLIDAYS to allow for an optional end date
VSE-5792	VistA: Modify SDES GET PATIENT REGISTRATION2 to return eligibility codes
VSE-5819	VistA: Create a new RPC to return patient registration data for the ids passed in
VSE-5889	VistA: Modify SDES GET PATIENT REGISTRATION2 to return the Date of Death

4. User Documentation

The documentation distributed with VS GUI Release 1.7.46.0 is available for download from the VA Software Document Library (VDL).

5. Known Issues

All known issues resolved by this release were documented in ServiceNow tickets and/or Jira issues as part of the ongoing, post-warranty, sustainment effort. Appropriate issues, workarounds, and step by step resolutions are documented in Knowledge Base articles and included in the searchable ServiceNow Knowledge Base hosted by the VA Enterprise Service Desk (ESD).
